POLYCOM VVX-400-410

POLYCOM VVX-300-310

What a **Hosted IP** will do compared to an **IP PBX**

Hosted IP generates:

- Improved service performance
- Increased staff productivity
- More efficient network resource utilization
- MAC time & dollar savings

These factors also favor Hosted IP:

- Geographically dispersed sites
- Demand for advanced feature functionality
- Remote & mobile end-users
- Viruses/ Hackers
- Disaster Recovery
- Scalability
- Gradual Transition
- Technology Obsolescence
- Vendor Support
- Moves, Adds & Changes (MACs)
- Proprietary Technology
- Dedicated Configured Space
- Total Cost of Ownership

Benefits of VOIP Telephony

Combines voice calls over the same infrastructure that delivers Internet connectivity, and allows businesses to save money - 20% or more per month.

Eliminates onsite phone equipment (key system or PBX) and consolidating wiring, also saves money.

You simply click on voice messages that have been delivered to your computer. You will listen to them (in the form of wave files), forward, delete and respond to them.

Enable your business phone system to screen calls according to your personal priorities. Calls will follow you where ever you choose

- to your cell phone
- to your home phone
- to your home-office phone

International Phone Card Options:

GlobalCallingCard: International Calling Card Access In Over 80 Countries.
